Local expression-cue prototype: illustrative controls

Synthetic text and score; not a participant record
or measured prediction

Local camera preview

No facial image shown

Example: neutral
Score: 0.62 (uncalibrated)

Compose a message

I will send the draft tomorrow.

☐ Attach current expression cue

Add to local preview

Default: off; camera off or invalid/stale observation: omit the cue

Opt-in resets after each message. No face does not mean neutral.

Messages remain local; no recipient-side transport is implemented.
